

CareSync ProActive AI Coordinator

Transforming Fragmented Post-Discharge Care into Proactive, Life-Saving Interventions with AI-Driven Intelligence

Pain Points by User

- **Care Nurses:** Manual tracking, hard prioritization.
- **Doctors:** Delayed patient updates, reactive care.
- **Admins:** Siloed systems, difficulty enforcing workflows.

Why It Matters

- Poor communication → missed complications.
- Higher readmission rates → billions in avoidable costs.
- Patient satisfaction suffers.

Hospital Readmissions

Challenges in Post-Discharge Care

- 1 in 5 Medicare patients are readmitted within 30 days.
- Manual, fragmented follow-ups overwhelm care teams.
- Doctors lack real-time visibility into patient recovery.
- Admins struggle with data integration and compliance.

CareSync ProActive Core Components

- **Salesforce Health Cloud:** Central patient hub.

DATA CLOUD

- **Data Cloud:** Unified patient data platform.

- **Agentforce AI:** Risk analysis + smart task suggestions.

- **Slack:** Real-time team collaboration.

- **SMS Gateway:** Supervised patient outreach.

CareSync ProActive

- AI-augmented post-discharge management.
- Built on Salesforce Health Cloud, Data Cloud, Agentforce AI, Slack.
- Proactive, connected, human-centered care workflows.

Impact on Users

◆ **Nurses**

AI-prioritized daily task lists help nurses focus on high-risk patients and time-sensitive activities, reducing burnout and improving care delivery.

◆ **Doctors**

Instant alerts and patient summaries delivered via Slack or mobile help physicians make faster, data-informed decisions without digging through records.

◆ **Admins**

Configurable workflows and secure oversight allow admins to ensure compliance, customize automations, and monitor performance from a central dashboard.

CareSync ProActive

Transforming Post-Discharge Care

Proactive, connected, safe care – powered by AI and Salesforce
